Dracula Theme Characteristics

When to use dracula theme

- Purple and pink accent colors
- Popular among developers
- Excellent dark mode experience
- Works in both light and dark variants

Configuration

Set `colortheme: "dracula"` in your theme configuration.

Box Components

Alert

Warnings with Dracula red accents.

Example

Examples with Dracula green.

Themed Block

All components adapt to the Dracula palette automatically.

Syntax Highlighting

```
def count_vampires(castle: str) → int:  
    """Count vampires in a given castle."""  
    residents = get_residents(castle)  
    return sum(1 for r in residents if r.is_vampire)
```

Focus slides with Dracula gradient
